<u>Appendix A: NADRC Webinars by Topic</u>	A-1
<u>Appendix B: List of Acronyms</u>	B-1

NADRC Webinars Compendium

The National Alzheimer’s and Dementia Resource Center (NADRC) Webinars Compendium includes information on dementia-focused webinars presented by NADRC from 2014 through 2025. Each NADRC webinar focuses on a specific dementia topic. The webinars offer practical tools and information to support people living with dementia and their caregivers. The Compendium presents webinars both chronologically and by topic (see [Appendix A](#)). Information on the webinar date, title, description, presenters, and topics is included for each entry. Webinar materials can be accessed using the hyperlinked titles appearing in the table below. A full list of acronyms is available in [Appendix B](#).

Date	Title	Description	Presenter(s)	Topic(s)
2014 Webinars				
9/11/2014	Palliative Care for People with Dementia	This webinar provides participants with an overview of palliative care and its application to people living with dementia. The case for using palliative care for people living with dementia at various stages is discussed and challenges related to palliative care are explored.	Laurel Coleman, MD <i>Alzheimer’s Advisory Council, Department of Health and Human Services (DHHS)</i>	End-of-life care
12/11/2014	Hospital and Emergency Department Use among Medicare Beneficiaries with Dementia: Variations by Residential Setting and Proximity to Death	This webinar provides participants with information on whether hospital and emergency department use different for Medicare beneficiaries with and without dementia. Differences are discussed across care settings and proximity to death.	Zhanlian Feng, PhD Joshua Wiener, PhD <i>RTI International</i>	Health care
2015 Webinars				
2/12/2015	Concepts and Examples of Dementia Capability	This webinar describes concepts of dementia capability and participants learn about two programs that employ dementia capability concepts. Information is presented on the University of California-Los Angeles Alzheimer’s and Dementia Care Program, which aims to provide coordinated, patient-centered care between primary care practices and community-based organizations. Participants also learn about the Dementia Care Services Program in North Dakota, which provides individualized assistance to caregivers of people living with dementia in rural areas.	Jane Tilly, DrPH <i>Administration for Community Living (ACL)</i> David Reuben, MD <i>David Geffen School of Medicine, University of California, Los Angeles (UCLA)</i> Gretchen Dobervich, BSW, LSW <i>Alzheimer’s Association, Minnesota-North Dakota Chapter</i>	Care management; Dementia capability

Date	Title	Description	Presenter(s)	Topic(s)
2015 Webinars (continued)				
2/26/2015	<u>Intellectual and Developmental Disabilities and Dementia- Experiences of a Family Advocate and Promising Practices</u>	This webinar provides participants with information on practices for working with people living with dementia and intellectual and developmental disabilities (IDD) and includes a caregiver's experience.	Phillip McCallion, PhD <i>Center for Excellence in Aging and Community Wellness, University at Albany</i> Mary Hogan <i>Family Advocate</i>	Intellectual and developmental disabilities; Lived experience
3/12/2015	<u>Outreach and Recruitment: Examples from the LGBT Community and Rural South Carolina</u>	This webinar provides participants with information on outreach and recruitment with two hard-to-reach populations of people with dementia and their caregivers. Anne Wolf speaks about efforts in South Carolina to serve rural areas of the state by providing services for people living with dementia and their caregivers. Jed Levine speaks about outreach and recruitment of people living with dementia and their caregivers in the lesbian, gay, bisexual, and transgender (LGBT) communities.	Anne Wolf <i>Lieutenant Governor's Office on Aging, the State Unit on Aging for South Carolina</i> Jed Levine <i>Alzheimer's Association, New York City Chapter</i>	Highest need communities; Outreach and recruitment
4/23/2015	<u>Behavioral Symptom Management Training for Family Caregivers: Training Examples and Implementation in Oregon</u>	This webinar provides participants with information on behavioral symptom management training for family caregivers of people with dementia and how one program was implemented into the community. Linda Teri, PhD, speaks about the importance of behavioral symptom management training and the ABC approach for addressing behavioral symptoms. Jennifer Mead, MPH, speaks about the implementation of the ABC approach into the STAR-C program in Oregon and practical considerations when implementing this type of program.	Linda Teri, PhD <i>University of Washington, School of Nursing</i> <i>Northwest Research Group on Aging</i> Jennifer Mead, MPH <i>Oregon Department of Human Services, Aging and People with Disabilities</i>	Behavioral symptom management training; Caregiver support
6/11/2015	<u>National Alzheimer's Project Act</u>	This webinar provides participants with information on the National Alzheimer's Project Act (NAPA). In particular, NAPA is discussed as it relates to care and services for people living with dementia and their caregivers and how updates to NAPA influence practice.	Rohini Khillan <i>Office of Disability, Aging, and Long-Term Care Policy, HHS Office of the Assistant Secretary for Planning and Evaluation</i>	Federal programs
7/9/2015	<u>Person-Centered Services for People with Dementia through the Framework of the MIND at Home Program</u>	This webinar provides participants with information on the program Maximizing Independence (MIND) at Home. MIND at Home uses evidence-supported care practices with people living with dementia to determine if these practices could delay or prevent the need to move from home to another setting, such as an assisted living facility or nursing home.	Quincy M. Samus, PhD <i>Johns Hopkins School of Medicine, Department of Psychiatry and Behavioral Sciences</i>	Care management; Evidence-based/evidence informed interventions

Date	Title	Description	Presenter(s)	Topic(s)
2015 Webinars (continued)				
7/30/2015	<u>Identifying and Supporting People with Dementia Who Live Alone</u>	The webinar focuses on the issue of persons living alone with dementia. Participants learn about prevalence and characteristics of people with dementia who live alone, signs of self-neglect and intervention strategies, and the experiences of people with dementia who live alone.	Michael Lepore, PhD <i>RTI International</i> Penny Harris, PhD <i>John Carroll University</i>	People living alone with dementia
9/1/2015	<u>Dementia Friendly Communities</u>	The webinar focuses on the issue of dementia-friendly communities. Participants learn about concepts related to Dementia Friendly Communities and examples of implementing these concepts into the community.	Emily Farah-Miller, MS <i>ACT on Alzheimer's</i> Annette Sandler, MA <i>Jewish Family and Children's Service of Minneapolis</i>	Dementia friendly
9/17/2015	<u>Business Planning for Dementia Programs</u>	The webinar focuses on the issue of business planning for dementia programs. Participants learn about the purpose of business planning for dementia programs, components of a business plan, funding strategies, and evaluation.	Deborah Paone, DrPH, MHA <i>Paone & Associates, LLC</i>	Business planning
12/17/2015	<u>Evaluating Dementia Programs</u>	This informative webinar addresses the various components for evaluating dementia programs including why and when program evaluation should be conducted, the basics of designing and conducting an evaluation, and how to use results of an evaluation to support program activities.	Michael Lepore, PhD <i>RTI International</i>	Developing, implementing, evaluating programs
2016 Webinars				
1/7/2016	<u>Racial and Ethnic Disparities in Dementia</u>	The webinar focuses on the issue of racial and ethnic disparities in dementia. Participants learn about racial and ethnic differences in dementia diagnoses, support systems, and use of formal services and how the Latino Alzheimer's and Memory Disorders Alliance works to alleviate some of differences in support and use of services as they relate to dementia.	Lisa Lines, PhD, MPH <i>RTI International</i> Constantina Mizis <i>Latino Alzheimer's & Memory Disorders Alliance (LAMDA)</i>	Dementia disparities; Highest need communities
1/28/2016	<u>Effective Communication and its Impact on Behavioral Symptoms in Persons with Dementia</u>	The webinar focuses on the issue of effective communication and its impact on behavioral symptoms in people living with dementia. Participants learn about various dementia care models that help explain why behavioral symptoms occur and how communication strategies can affect behavior. They also learn about a model used in a specialized dementia care facility that focuses on effective ways to communicate with people living with dementia to meet their underlying emotional needs.	Cathy Piersol, PhD <i>Thomas Jefferson University</i> Judy Berry <i>Dementia Specialist Consulting</i>	Communication

Date	Title	Description	Presenter(s)	Topic(s)
2016 Webinars (continued)				
3/3/2016	Writing Effective Proposals	This webinar focuses on how to (1) read a grant or contract announcement to identify the key requirements, (2) structure the proposal writing process, (3) better understand the key characteristics of strong proposals, and (4) learn what is important to proposal reviewers.	Joshua Wiener, PhD <i>RTI International</i>	Developing, implementing, evaluating programs; Federal programs
4/14/2016	Mobile Applications for the Community and Law Enforcement to Assist Vulnerable Adults	Participants who attend this webinar learn about the development and implementation of two mobile applications that are designed to assist vulnerable adults who live alone.	David Cardell <i>EyeOn App</i> Sharee Rines <i>Georgia Adult Protective Services</i>	First responders; People living alone with dementia
5/5/2016	Veterans Affairs Mobile Adult Day Health Care Program	Participants who attend this webinar learn about how the Veterans Affairs (VA) Mobile Adult Day Program meets the specific needs of people living with dementia through its programming, staff training, and support to caregivers.	Karen Massey, BSN, RN <i>Veterans Affairs Central Office</i> Karen Elechko, MSN, RN <i>Coatesville VA Medical Center</i>	Federal programs; Veterans
6/22/2016	The Health Resources and Services Administration (HRSA)'s Geriatric Workforce Enhancement Program (GWEP): Preparing a Dementia Capable Workforce	Participants who attend this webinar learn about HRSA's efforts to develop a dementia-capable workforce, which includes identifying ways for efficient dementia case finding, learning about lifestyle interventions for persons living with dementia, developing effective communication strategies across all levels of care, and learning about inter-professional health care teams that include community service partners.	Joan Weiss, PhD, RN, CRNP, FAAN <i>HRSA, Division of Medicine and Dentistry, Bureau of Health Workforce</i> John Morley, MB, BCH <i>Saint Louis University GWEP</i> Erin E. Emery-Tiburcio, PhD, ABPP <i>Rush University Medical Center</i>	Federal programs; Workforce
7/20/2016	Legal Planning Essentials for Persons with Dementia	Participants who attend this webinar learn about the benefits of legal planning for the future of a person living with dementia, review the urgency and obstacles of legal planning for persons living with dementia, and understand how supported decision making principles interact with legal planning to ensure that choices made reflect the wishes of the person with dementia.	David Godfrey, JD <i>American Bar Association Commission on Law and Aging</i>	Advance planning

Date	Title	Description	Presenter(s)	Topic(s)
2016 Webinars (continued)				
8/23/2016	<u>Examples of Developing and Implementing Faith-Related Dementia Programs</u>	Participants who attend this webinar learn about two faith-related programs for people living with dementia and their caregivers—Alzheimer’s Orange County Interfaith Outreach Program in Orange County, California, and the Respite Ministry in Montgomery, Alabama.	Patty Barnett Mouton <i>Alzheimer’s Orange County</i> Daphne Johnston, MA <i>First United Methodist Church Respite Care Ministry</i>	Faith-based programs; Outreach and recruitment
9/22/2016	<u>Translating Evidence-Based Dementia Interventions into the Community: ADSSP Grantee Experience</u>	Participants who attend this webinar learn about the successes and barriers associated with translating evidence-based interventions into the community through two ADSSP grant projects.	Katie Maslow <i>Gerontological Society of America</i> Linda Samia, PhD, RN, CNL <i>University of Southern Maine</i> Jeff Doucet, MBA, CPM <i>Nevada Aging and Disability Services Division</i>	Developing, implementing, evaluating programs; Evidence-based/evidence informed interventions
12/19/2016	<u>Writing an Effective Workplan and Evaluation Plan</u>	Participants who attend this webinar (1) learn how to write project objectives, activities, and tasks; (2) learn key elements of an evaluation plan; (3) understand the importance of providing specific details in the work plan and evaluation plan; and (4) find out about available tools and resources.	Stephanie Hughes, MPP Elizabeth Gould, MSW <i>RTI International</i>	Developing, implementing, evaluating programs
2017 Webinars				
1/17/2017	<u>Cultural Awareness in Dementia Care</u>	This NADRC webinar shares information on the Minnesota Board on Aging’s “Cultural Awareness in Dementia Care” initiative designed to promote principles of health equity and enhance person-centered dementia care for diverse ethnic and cultural communities who have the highest health disparities. This program strives to create cultural awareness among service providers that will result in culturally responsive service to persons with dementia and their caregivers.	Nancy E. Lee, MRP <i>Minnesota Board on Aging</i> Steve Chapman, MPA <i>American Indian Consultant</i> Farhiya M. Farah, MPH, CHES <i>Somali Consultant & GlobeGlow Consulting and Research, Inc.</i>	Cultural awareness; Dementia disparities; Highest need communities

Date	Title	Description	Presenter(s)	Topic(s)
2017 Webinars (continued)				
2/15/2017	Lewy Body Dementia: The Importance of Comprehensive Care and Support	This webinar provides an overview of Lewy Body Dementia (LBD) and how it differs from Alzheimer’s disease and Parkinson’s. Attendees learn about the symptoms and treatments for LBD and how the disease impacts caregivers. First-hand experiences and compensatory strategies are shared by a person living with LBD.	Angela Taylor <i>Lewy Body Dementia Association</i> Robert Bowles <i>LBD Patient Advocate/Blogger</i>	Lewy body dementia; Lived experience
3/7/2017	Methods and Techniques for Early Screening for Dementia for People with Intellectual and Developmental Disabilities	This webinar describes various forms of dementia that are found in the IDD field, the frequency of occurrence, and the importance of early detection. Also discussed are the early signs that are often overlooked and techniques to incorporate the early dementia screening tool into the routine health care regimen.	Sandra Fournier, MSN, RN, CDDN, CBIS <i>Seven Hills Foundation</i> Kathleen Bishop, PhD <i>National Task Group on Intellectual Disabilities and Dementia Practices</i>	Intellectual and developmental disabilities; Screening tools
5/16/2017	Providing Safe and Effective Nutrition for People with Dementia	The presenters identify the unique nutrition concerns and needs of people living with dementia and provide tips on addressing these needs. Participants in this webinar identify concerns around safety and nutrition in people living with dementia, and list ways to address nutrition concerns.	Janet S. McKee, MS, RDN, CSG, LD/N <i>Nutritious Lifestyles</i> Liz Weaver, MS, LSW <i>Southern Maine Agency on Aging</i>	Nutrition; Safety
6/20/2017	Using BRFSS Data from the Cognitive Decline and Caregiver Modules for Action	The subject of this webinar is CDC’s Behavioral Risk Factor Surveillance System (BRFSS). BRFSS is a nationally representative survey of states and territories in the United States. Participants in this webinar learn about BRFSS’s background, purpose, and types of data collected; describe the BRFSS cognitive decline and caregiver modules and their purpose; and list ways to translate BRFSS data into outcome-oriented actions.	Lisa C. McGuire, PhD <i>National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention</i> Wayne Tormala <i>Arizona Department of Health Services</i>	BRFSS data; Federal programs
7/19/2017	Building Dementia Capable Communities: An Orange County, North Carolina Case Study	This webinar shares the core components of what makes a community dementia capable, and how Orange County is addressing each of the components at the individual, organizational and community levels. With an emphasis on community level engagement, this case-study webinar describes programs implemented recently, as well as challenges they continue to face.	Mary Fraser, DSW Marie Dagger, MS, OTR/L <i>Orange County Department on Aging</i>	Dementia capability

Date	Title	Description	Presenter(s)	Topic(s)
2017 Webinars (continued)				
8/8/2017	<u>Advance Planning for People with Dementia: Legal Services Voucher Program in Delaware and New Consumer Planning Guides</u>	This webinar focuses on how the Division of Services for Aging and Adults with Physical Disabilities developed their legal services voucher program, as well as the legal training seminar for Delaware’s attorneys that took place before program rollout. A new series of consumer guides, developed by the National Alzheimer’s and Dementia Resource Center, are also reviewed. These guides cover advance-planning topics and are designed specifically for people living with dementia.	Julie P. Miller, Esq. Patricia Justice, Esq. <i>Delaware Division of Services for Aging and Adult with Physical Disabilities</i> Stephanie Hughes, MPP <i>RTI International</i>	Advance planning
9/12/2017	<u>Identifying and Supporting Dementia Caregivers in Health Care Settings</u>	This webinar defines the challenges and benefits of including family caregivers as members of the health care team. Participants learn about the benefits of improving family caregivers’ representation in the Electronic Health Record (EHR) of persons living with dementia and ways that health care systems could better identify family caregivers in EHRs and other forms of Health IT.	Alan B. Stevens, PhD <i>Baylor Scott & White Health</i> Debra Cherry, PhD <i>Alzheimer’s Greater Los Angeles</i>	Health care
9/27/2017	<u>HIPAA Regulations and Sharing Sensitive Information about Clients with Dementia</u>	This webinar reviews how the Health Insurance Portability and Accountability Act (HIPAA) and its Privacy Rule permits the sharing of patient information with family members, friends and caregivers, as well as the components of the HIPAA right-of-access and ways in which it enables individuals and their caregivers to be more involved in their own care.	Charlie Sabatino <i>ABA Commission on Law and Aging</i> Rachel Seeger <i>Office for Civil Rights, DHHS</i>	Health care; HIPAA
2018 Webinars				
1/16/2018	<u>Frontotemporal Degeneration: The Importance of Knowledge, Advocacy and Support to Advance Quality Care</u>	This webinar provides an overview of frontotemporal degeneration (FTD) disorders and how they differ from Alzheimer’s disease and other dementias. Participants learn the symptoms, approaches to care, and importance of support for the family system. An individual living with FTD and his wife share their experiences and strategies for maintaining quality of life.	Sharon S. Denny <i>The Association for Frontotemporal Degeneration (AFTD)</i> Brandt Henderson Marie Henderson <i>FTD Advocates</i>	Frontotemporal degeneration
1/30/2018	<u>International Perspectives on Supporting People with Dementia and Caregivers</u>	This webinar provides international perspectives on supporting people living with dementia and their caregivers. The presentation describes results from a survey on stigma given to people living with dementia and caregivers from 54 countries. The presentation also describes Scotland’s 10-year journey to improve dementia care and how Focus on Dementia is supporting the implementation of the dementia strategy in practice.	Nicole Batsch, PhD <i>Global Brain Health Institute</i>	Innovative programs

Date	Title	Description	Presenter(s)	Topic(s)
2018 Webinars (continued)				
3/13/2018	<u>The Memory Ensemble: Using Improvisation to Improve Quality of Life for Persons Living with Dementia</u>	This webinar provides participants with information on the Memory Ensemble™, which is an 8-week improvisational theater intervention program for people with early-stage dementia. The mission of the Memory Ensemble is to improve the quality of life for people with dementia and their families; to investigate the benefits of this non-pharmacological intervention; and to translate these benefits to other communities.	Christine Mary Dunford, PhD <i>Lookingglass Theatre Company</i> Darby Morhardt, PhD, LCSW <i>Cognitive Neurology and Alzheimer's Disease Center Northwestern University Feinberg School of Medicine</i>	Innovative programs
4/10/2018	<u>Trauma Informed Care for People Living with Dementia</u>	Trauma can occur at any point in life as a result of a number of experiences such as war, abuse, neglect, or violence. The effects of trauma can be lifelong. As such, trauma-informed care can be used to assist people living with the effects of trauma as they navigate other aspects of life, including living with dementia and caring for someone who has dementia. In this webinar, principles of trauma-informed care are discussed as they apply to dementia in Veterans and Holocaust survivors. The webinar presents resources for applying trauma-informed care principles in various settings.	Matthew Yoder, PhD <i>National Center for PTSD</i> Andrea Korsunsky <i>Center for Dementia Care</i>	Trauma-informed care
4/18/2018	<u>The Case for Palliative Care for Persons with Intellectual and Developmental Disabilities and Dementia</u>	Pain management and palliative care are often difficult to access for people with both IDD and dementia. This webinar uses recent work from the International Summit on Intellectual Disability and Dementia, which defined advanced dementia, proposed how palliative care services (including hospice) may be used and made recommendations for completing advance directives and advance care planning prior to the extensive progression of dementia. Case examples help illustrate the value of service integration efforts between intellectual disability and palliative care providers, specialized training for caregivers on end-of-life care and supports, and involvement of adults with intellectual disability early on in their advance care planning.	Mary Hogan, MAT <i>Family Advocate</i> Philip McCallion, PhD <i>Temple University School of Social Work</i>	End-of-life care; Intellectual and developmental disabilities; Person-centered care

Date	Title	Description	Presenter(s)	Topic(s)
2018 Webinars (continued)				
6/26/2018	<u>Finding the Balance: Enhancing Self-Efficacy in Persons Living with Dementia</u>	Few attributes of personhood are more protected than self-determination, and few fears more troubling than the fear of losing independence. For people living with dementia this can be particularly intense. Using stories taken from experience, the presenter illustrates why preserving autonomy and enhancing self-efficacy in people living with dementia are important. The presentation also addresses ways professionals can support individuals living with dementia—and their families—in making decisions, even in the context of diminished decision-making capacity.	Susan Wehry, MD <i>University of New England College of Osteopathic Medicine</i>	Person-centered care; Self-efficacy
7/10/2018	<u>Disaster Preparedness for Community-dwelling Older Adults with Dementia and Caregivers</u>	This webinar provides a brief overview of risk factors that affect older adults' and family caregivers' preparation and response to a natural disaster. Characteristics of recent disasters in Northern and Southern California are summarized to highlight the vulnerabilities of older adults living in areas prone to wildfires and weather emergencies. The design, implementation, and evaluation of a pilot program conducted at the VA Palo Alto Healthcare System that targets disaster preparedness of community-dwelling Veterans with dementia and their family caregivers is described. Also discussed are policy and planning implications of lessons learned in the pilot, as well as opportunities for promoting safety for community-dwelling older adults experiencing disasters.	Betty Wexler, RN, MS, CNS <i>Consultant</i> Nancy Oliva, PhD, MHA, MPA, MS, RN <i>University of California, San Francisco (UCSF) Institute for Health and Aging</i>	Disaster preparedness; Safety
7/31/2018	<u>Health Disparities in People Living with and at Risk for Dementia</u>	In this webinar, Andrea Garr provides an overview of the United Family Caregivers project in Milwaukee, Wisconsin, and lessons learned from this project. She also discusses best practices when working in cross-cultural environments with African American caregivers. Dr. Lisa Barnes' portion of the presentation focuses on disparities in Alzheimer's dementia and cognitive impairment as it relates to African Americans. She discusses some of the most widely cited reasons for the disparities and describe findings on risk factors for cognitive decline from her cohort study, the Minority Aging Research Study.	Lisa L. Barnes, PhD <i>Rush Alzheimer's Disease Center</i> Andrea Garr <i>Milwaukee County Department on Aging</i>	Caregiver support; Dementia disparities; Highest need communities

Date	Title	Description	Presenter(s)	Topic(s)
2018 Webinars (continued)				
8/7/2018	First Responder Training and Programs to Support People with Dementia	Creating safer communities for people living with dementia requires collaboration between law enforcement, local governments, and health and human service organizations. In this session, Jessica Empeño of Alzheimer’s San Diego shares lessons learned through one such partnership and offers attendees interested in working with local law enforcement departments and first responder units practical strategies for outreach, training, and collaboration. Molly Schroeder from the Wisconsin Alzheimer’s Institute discusses how the development of the Emergency Medical Services Visitor Program in Wisconsin is bridging gaps and connecting the elderly population to community-based resources, with the goal of helping people with dementia who live alone remain safely in their homes as long as possible.	Jessica Empeño, MSW <i>Alzheimer’s San Diego</i> Molly Schroeder, CSW <i>Wisconsin Alzheimer’s Institute, University of Wisconsin School of Medicine and Dentistry</i>	First responders; Innovative programs; People living alone with dementia; Safety
9/12/2018	Improving Health Care for Persons Living with Dementia	People living with dementia are frequently under-recognized and under-diagnosed by health care providers; consequently, they do not receive the medical care they need, nor are they connected to essential home and community-based supports. The federal duals demonstration offers opportunities to better blend funding and oversight for Medicare-funded medical care with Medicaid-funded long-term services and supports, so that people living with dementia and their families can get better integrated care. This webinar offers tools and strategies to improve dementia health care, approaches that have been developed within this demonstration model, but also have relevance to other health care systems.	Debra Cherry, PhD <i>Alzheimer’s Los Angeles</i> Lora Connolly, MSG <i>California Department of Aging</i> Katie Scott, MPH <i>BakerRipley</i>	Care management; Federal programs; Health care
12/18/2018	Healthy Brain Initiative Road Map: State and Local Public Health Partnerships to Address Dementia	The 2018-2023 Road Map is informed by four Essential Services of Public Health—assure a competent workforce, monitor and evaluate, develop policies and mobilize partnerships, and educate and empower the nation. Action within each of these four domains is guided by three core principles to best ensure health equity, collaboration across multiple sectors, and the need to leverage resources for sustained impact. Lisa McGuire describes this newly released Road Map. Susan Engels from the Washington Department of Social and Health Services describes how Washington designed and is implementing a successful program aligned with CDC’s Healthy Brain Initiative.	Lisa C. McGuire, PhD <i>CDC</i> Susan Engels, CPM <i>Washington State Department of Social & Health Services</i>	Brain health; Federal programs

Date	Title	Description	Presenter(s)	Topic(s)
2019 Webinars				
1/30/2019	<u>Measuring Outcomes to Evaluate Dementia Programs and Initiatives</u>	This webinar reviews strategies, challenges, and benefits of measuring outcomes to evaluate dementia programs and interventions. First, the rationale for outcome measurement and the value of different measurement strategies is reviewed. Next, strategies for selecting outcome measures, including considerations of measurement burden as well as the frequency and scheduling of data collection are discussed. Finally, the Rosalynn Carter Institute presents a past experience in using measured outcomes during program implementation and expansion.	Michael Lepore, PhD Stephanie Hughes, MPP <i>RTI International</i> Elizabeth Blount, MA <i>Rosalynn Carter Institute for Caregiving</i>	Developing, implementing, evaluating programs
3/13/2019	<u>Vascular Dementia: An Important Supporting Actor in the Story of Dementia</u>	Cerebrovascular disease plays an important supporting role in many persons with mild cognitive impairment and dementia and often co-occurs with Alzheimer's disease. This webinar provides an overview of the role of cerebrovascular disease in late life cognitive impairment including risk factors and common misconceptions. The challenges associated with understanding the role of vascular risk factors, stroke history, and stroke imaging findings are explored. In addition, issues related to managing the symptoms of vascular dementia are discussed.	David Knopman, MD <i>Mayo Clinic</i>	Vascular dementia
5/7/2019	<u>The Messages We Send: Stigma Toward Persons Living with Dementia and How to End it</u>	In this webinar, discover the types of stigma that can affect persons living with dementia. Learn about the role language plays in stigma around Alzheimer's disease, including how it perpetuates stigma and how it helps heal the injuries created by it. Acquire everyday strategies for countering stigma through person-centered approaches. Hear from a person with early-stage dementia about her experiences related to these issues.	Shana D. Stites, PsyD, MS, MA <i>University of Pennsylvania, Perelman School of Medicine</i> Cynthia Huling Hummel, BS, MDiv, DMin	Lived experience; Stigma
5/21/2019	<u>Engaging, Training and Implementing Programs that Utilize Volunteers for Dementia Programs</u>	Volunteers can provide valuable support for organizations serving persons living with dementia and their caregivers by enabling organizations to expand their capacity and plan for long-term sustainability. This webinar focuses on finding, training, and retaining volunteers; providing volunteers with meaningful work; and determining which volunteers are a good match for programs that serve persons living with dementia and their caregivers.	Kay Wallick <i>Dementia Friendly Wyoming</i> Daphne Johnston <i>The Respite Ministry at First United Methodist Church Montgomery</i>	Volunteers

Date	Title	Description	Presenter(s)	Topic(s)
2019 Webinars (continued)				
6/4/2019	Caregiving for People Living with Non-Alzheimer's Dementia	In recent years, research on Alzheimer's disease has increased significantly, but there has been less focus on other types of dementias. Because less is known about non-Alzheimer's dementias, under- and misdiagnosis is common, treatment protocols are lacking, and it is not clear how best to support people with these dementias and their caregivers. This webinar provides an overview of the three most common causes of dementia after Alzheimer's disease, which include Lewy body dementia, frontotemporal degeneration, and vascular dementia. Presenters draw on available information to describe caregiving for people living with these dementias.	Sharon S. Denny <i>The Association for Frontotemporal Degeneration</i> Sari Shuman <i>RTI International</i> Angela Taylor <i>Lewy Body Dementia Association</i>	Caregiver support; Frontotemporal degeneration; Lewy body dementia; Vascular dementia
6/25/2019	Addressing Social Isolation and Loneliness Among People Living with Dementia	Studies indicate that 28% to 34% of people with dementia are socially isolated and live alone. With no one else living in the home to observe changes in the individual's cognitive and functional abilities, the progressive decline associated with dementia may go unnoticed until an emergency occurs. In addition, some studies have found that people with dementia who live alone may not manage their daily activities as well or at all when they feel lonely. This webinar focuses on strategies programs can use to address social isolation and loneliness among people living with dementia who live alone.	Sarah Dulaney, RN, MS, CNS <i>UCSF Memory and Aging Center</i> Donald R. Smith <i>United Way of Tarrant County</i>	People living alone with dementia; Social isolation
7/24/2019	ACL Dementia Grantee Developed Products: Virginia's Collaborative Care Coordination Model and Eddy Alzheimer's Services Training on Dementia Care for Persons with Intellectual and Developmental Disabilities	Administration for Community Living (ACL) dementia grantees often develop products that are used by the developing organization and are beneficial to others working in various areas of dementia. This webinar features two products developed by grantees: (1) a model of coordinated dementia care and (2) a dementia training for professional caregivers of people with IDD. The coordinated care model was developed and piloted through a collaborative relationship between the University of Virginia's Memory and Aging Care Clinic and the Jefferson Area Board for Aging, the local Area Agency on Aging (AAA). The dementia training was designed specifically for professional caregivers of people with IDD by Eddy Alzheimer's Services.	George Worthington <i>Virginia Department for Aging and Rehabilitative Services</i> Jennifer Harvey, MSW, CDP <i>Eddy Alzheimer's Services</i>	Innovative programs; Intellectual and developmental disabilities

Date	Title	Description	Presenter(s)	Topic(s)
2019 Webinars (continued)				
8/6/2019	<u>Financial Capacity for People with Dementia and their Caregivers</u>	The irreversible and progressive nature of dementia underscores the importance of planning for the future as soon as is practical for the person living with dementia and their caregivers or family. As dementia progresses, a person living with dementia will lose the ability to manage care and finances. Future planning for those affected by dementia can include identifying health care and supportive service options, determining how care will be funded, and examining useful financial and legal resources. This webinar focuses on key aspects of financial, legal, and health care planning that can help to ensure a more stable future for persons living with dementia and their caregivers.	Cindy Hounsell Laurel Beedon <i>Women's Institute for a Secure Retirement</i>	Advance planning
9/17/2019	<u>Strategies for Sustaining ACL Dementia Grant Projects and Lessons Learned Over Time</u>	ACL dementia grants provide funding to strengthen dementia-capable systems and to plan and implement programs to support the needs of people living with dementia and their caregivers. Throughout the course of the grant period, grantees develop strategies to sustain their programs. This webinar provides examples of two ACL dementia grant programs that are successfully sustaining portions of their initial grant programs. Lessons learned and strategies used to sustain these dementia programs are applicable to many types of community-based programs.	Katie Scott, MPH <i>BakerRipley</i> Alexandra Morris <i>Alzheimer's Association, Northern California Northern Nevada</i>	Sustaining programs
10/29/2019	<u>Younger Onset Alzheimer's Disease: Exploring the Emotional Experience and the Importance of Community</u>	Living with Alzheimer's disease is a challenge, changing life for both the person with the disease and their family. But what if someone diagnosed with this disease was in their early 60s, their 50s, or even as young as in their 30s? Younger onset Alzheimer's disease affects people ages 65 years old or younger. Although the exact number of people with younger onset is unknown, the impact of living with Alzheimer's in midlife is great. For more than 15 years, the Rush Alzheimer's Disease Center in Chicago has offered Without Warning, a large support program for families living with younger onset Alzheimer's disease. This presentation is informed by the experiences of Without Warning members. The webinar examines the emotional journey of younger onset Alzheimer's disease and the importance of community in providing support.	Susan Frick, MSW, LSW <i>Rush Alzheimer's Disease Center</i>	Younger onset dementia

2019 Webinars (continued)				
11/20/2019	<u>The Power of Social Connection: Memory Cafés and Tête-à-Tête</u>	This webinar provides an overview of the memory café model and an application of the model in the state of Florida. Presenters discuss tips for memory café success, drawing from the experience of a network of over 100 memory cafés in Massachusetts. The webinar also introduces the concept of a memory café network to foster the spread of these programs. Further, presenters discuss how the interprofessional health care team at Florida Atlantic University partnered with a faith-based organization to create a culturally responsive and linguistically appropriate Memory Café-inspired activity named Tête-à-Tête.	<p>Beth Soltzberg, LICSW, MBA <i>Jewish Family & Children's Service</i></p> <p>María de los Ángeles Ordóñez, DNP, APRN, GNP-BC, PMHNP-BC, FAANP, FAAN <i>Louis and Anne Green Memory and Wellness Center</i></p>	Innovative programs
2020 Webinars				
1/28/2020	<u>Innovative Approaches to Reach Underserved Populations Living with Dementia</u>	Community-based services and supports for people living with dementia and their caregivers may not target the specific needs and concerns of people in some underserved communities. This webinar provides two program examples that strive to meet the needs of specific underserved groups including the Latino population and persons with IDD and dementia.	<p>Debra L. Cherry, PhD, <i>Alzheimer's Los Angeles;</i></p> <p>Kelli N. Barton, PhD., <i>University of Missouri - Kansas City</i></p>	Highest need communities; Innovative programs; Intellectual and developmental disabilities; Outreach and recruitment
1/28/2020	<u>Finding the Right Fit: Choosing Dementia Caregiving Programs for your Organization and Community</u>	There is ongoing interest in launching new programs to support caregivers of people living with dementia. Over the past two decades, a wide range of these programs have been developed to help offset adverse effects of caregiving. To find the program with the best fit, an organization should understand the internal and external factors driving their own needs and understand the wealth of programs that exist for supporting caregivers. This webinar outlines important areas for organizations to consider before they introduce a new program in their community, and highlights Best Practice Caregiving, a data- rich resource providing information on more than 40 dementia caregiving programs.	<p>Heather L. Menne, PhD <i>RTI International</i></p> <p>David M. Bass, PhD <i>Benjamin Rose Institute on Aging</i></p>	Caregiver support; Developing, implementing, evaluating programs;

2020 Webinars (continued)				
2/12/2020	<u>Occupational Therapy and Social Work: Offering community-based approaches to support PLWD and their caregivers</u>	This webinar discusses the beneficial role of occupational therapy and social work for people living with dementia and their caregivers. Evidence-based/ informed interventions being implemented through ACL-Alzheimer’s Disease Programs Initiative (ADPI) projects for people living alone with dementia, for those with IDD and dementia, and for those with distressing behaviors are discussed. Recommendations on ways to help clients receive appropriate occupational therapy services are shared. In addition, community-based approaches utilizing social workers to serve people living with dementia and their caregivers are discussed.	Stephani Shivers, MEd, OTR/L <i>Live Well</i> Jane Gruner, LMFT <i>Nevada Senior Services</i>	Allied health; Behavioral symptom management training; Evidence-based/evidence informed interventions; Intellectual and developmental disabilities; People living alone with dementia
4/13/2020	<u>Lesbian, Gay, Bisexual, Transgender (LGBT) Dementia Care: What We Can Do to Support LGBT Adults Living with Dementia</u>	Lesbian, gay, bisexual, transgender (LGBT) older adults may be at greater risk for dementia and yet many services are not designed with LGBT individuals in mind. The San Francisco LGBT Dementia Care Project is an innovative project with the goal of increasing access to dementia-capable care for the LGBT community. This webinar highlights the importance and challenges of reaching a vital but invisible population. Learn how you and your organization can be more attuned to the needs of LGBT constituents with dementia by adapting policy and programmatic changes.	Arthur Chan, MSocSC <i>Alzheimer’s Association, Northern California and Northern Nevada Chapter</i> Charles Symes, <i>Alegre Home Care</i>	Highest need communities; Innovative programs;
5/19/2020	<u>Addressing Dementia in Indian Country: Where We Are and What Comes Next</u>	The number of older adult American Indians and Alaska Natives is increasing, and because dementia is more common with advanced age, as this population grows so too will the impact of cognitive impairment and related caregiving. Communities are taking note of this trend and are taking action to promote brain health and improve community knowledge about dementia and are discerning their approach to support caregivers. This webinar presents key background material, and an American Indian leader talks about their dementia-related activities.	Michael Splaine <i>Splaine Consulting</i> Carla Eben <i>Pyramid Lake Paiute Tribe Numaga Senior Services Program</i>	Highest need communities; Tribal communities

Date	Title	Description	Presenter(s)	Topic(s)
2020 Webinars (continued)				
6/16/2020	<u>Dementia Workforce Development: Two Models to Prepare for the Future</u>	An introduction to critical issues in the dementia workforce is presented. The CATCH-ON program at Rush University Medical Center is addressing workforce needs in unique ways through its Geriatric Workforce Enhancement Program. Dr. Erin Emery-Tiburcio discusses various aspects of CATCH-ON, including the development of Dementia Friendly Communities in Illinois and resources for building your local dementia workforce. A second dementia workforce program example is provided by Ms. Katelyn Marschall. Ms. Marschall provides an overview of the Wisconsin Dementia Care Specialist Program and how the Dementia Care Specialist Program impacts people living with dementia and their families. Practical resources for dementia professionals developed for use in community-based settings are also provided.	Erin Emery-Tiburcio, PhD, ABPP <i>Rush University Medical Center</i> Katelyn Marschall, MPH <i>Wisconsin Department of Health Services</i>	Workforce
8/27/2020	<u>Navigating the World of Assistive Technology for People Living with Dementia</u>	Are you caring for a person living with dementia? Do you want to expand your “toolbox” with strategies and solutions for someone living with dementia or Alzheimer’s disease? This webinar describes a number of assistive technologies that can benefit people living with dementia and their caregivers.	Carolyn Philips, MEd <i>Center for Inclusive Design and Innovation</i> Rachel Wilson, AOS <i>Georgia Institute of Technology</i>	Assistive technology
9/15/2020	<u>Hospital2Home-Dementia Capable Care Transitions: Better Care, Better Outcomes</u>	Persons with cognitive impairment and their care partners experience daunting challenges receiving dementia-capable health care and related community-based transition services during and after a hospital stay. As many as 25% of elderly hospital patients may have dementia, often without a recorded diagnosis. Best practices in hospital-to-home care transitions have been shown to reduce readmission rates as well as mitigate the potential for poor outcomes. This presentation introduces participants to Hospital2Home, a highly successful care transitions model for people living with dementia with a hospital readmission rate of less than 1%.	Jeffrey B. Klein, FACHE <i>Nevada Senior Services</i>	Care transitions
10/19/2020	<u>Providing In-Person Services and Supports to People Living with Dementia during COVID-19</u>	At the onset of COVID-19, most community-based in-person services and supports that people living with dementia and their caregivers rely on were suspended. In limited cases, however, in-person services continued. During this webinar, two providers discuss how their organizations used innovative approaches to ensure that people living with dementia continued to receive needed services through traditional means of in-person delivery during COVID-19.	Victoria Jump, MPA <i>Ventura County Area Agency on Aging</i> Jeffrey Klein, FACHE <i>Nevada Senior Services</i>	Innovative programs

Date	Title	Description	Presenter(s)	Topic(s)
2020 Webinars (continued)				
10/20/2020	<u>Adapting Caregiver Interventions to Support Caregivers of People with Intellectual and Developmental Disabilities and Dementia</u>	Through ACL’s ADPI grant program the city of Chicago commissioned Dr. Philip McCallion (Temple University) to develop and present this video to train people to support caregivers of people living with IDD and dementia.	Dr. Philip McCallion <i>Temple University</i>	Caregiver support; Intellectual and developmental disabilities
10/22/2020	<u>Sustaining Programs for People Living with Dementia and their Caregivers: Billing for Dementia Services</u>	Dementia services and supports play an important role in helping people who are living with dementia remain in their communities. Providers have expanded the range of dementia services they offer, but identifying sustainable sources of reimbursement is an ongoing challenge. Billing third-party payers, such as fee-for-service Medicare and private insurance, may provide one sustainable source of funding. This webinar provides an overview of a “Guide to Billing Codes for Dementia Services” developed by the National Alzheimer’s and Dementia Resource Center. Following the overview, Jill Cigliana of Memory Care Home Solutions in St. Louis, Missouri, provides examples of how her organization utilizes third-party billing to help sustain their work.	Jill Cigliana, MSOT, OTR/L <i>Memory Care Home Solutions</i> Donna Walberg, MBA <i>RTI International</i>	Sustaining programs
11/2/2020	<u>Using Technology to Provide Services to People Living with Dementia and their Caregivers during COVID-19</u>	In an effort to maintain the provision of services and supports to people living with dementia and their caregivers during the COVID-19 pandemic, some organizations pivoted in-person programs to virtual formats. This webinar provides two examples of programs that used technology to provide continuity of services to their clients. Wisconsin’s United Community Center’s Mobile Memory Clinic adopted HIPAA-compliant telemedicine platforms to complete client assessments and Houston’s Amazing Place implemented the evidence-based Savvy Caregiver program through an online platform.	Vanessa Anciani, BASW <i>Wisconsin United Community Center</i> Sharon Cantrell, MS <i>Amazing Place</i>	Virtual programs

2020 Webinars (continued)				
11/19/2020	Maintaining Services and Support to People Living with Dementia and Caregivers During the COVID-19 Pandemic	COVID-19 presented unique challenges to persons living with dementia and their caregivers. Advanced age, underlying conditions, and cognitive decline put them at a greater risk of contracting the virus. Supportive services are essential for people living with dementia and their caregivers, and many organizations that provide those services had to find ways to sustain them amid COVID-19. This webinar highlights the work of two ACL dementia grantees that pivoted their work to continue caring for their clients in innovative ways.	<p>Christine J. Jensen, PhD <i>Riverside Center for Excellence in Aging and Lifelong Health</i></p> <p>María de los Ángeles Ordóñez, DNP, APRN, GNP - BC, PMHNP - BC, FAANP, FAAN <i>Louis and Anne Green Memory and Wellness Center</i></p>	Innovative programs
2021 Webinars				
1/13/2021	Reaching Socially Isolated People Living with Dementia	Persons with dementia face social isolation (even before COVID-19) through a combination of social and demographic factors. This webinar discusses what we know about these people and the precarity of their lives and describes experimental outreach and engagement techniques and programs. The webinar includes a description of a collaborative care coordination model used in Virginia to help individuals living with dementia. In particular, the focus is on reaching individuals living alone, the challenges reaching them, and the challenges experienced by people living alone with dementia.	<p>Michael Splaine <i>Splaine Consulting</i></p> <p>Carol A. Manning, PhD, ABPP-CN <i>Memory and Aging Care Clinic University of Virginia</i></p>	People living alone with dementia; Outreach and recruitment; Social isolation
2/9/2021	Exploring Male Caregiving for People Living with Dementia	Effective Alzheimer’s disease and dementia caregiving requires skills and understanding that are not entirely intuitive. For many men, these challenges are heightened because they are not socialized to be caregivers. This does not mean that males aren’t eager to be caregivers. However, because of the ever-changing nature of dementia disease, caregiving cannot be approached as a problem to be solved. This webinar discusses burdens specific to male caregivers, including skill-building, asking for and receiving help, and self-care. A male caregiver joins the presenter to provide a first-person perspective.	<p>Molly Perdue, MA, MS, PhD <i>Alzheimer’s Family Support Center of Cape Cod</i></p>	Caregiver support; Lived experience

2021 Webinars (continued)				
3/11/2021	<u>Complex Care Management for People Living with Dementia</u>	People living with dementia are at a higher risk for institutionalization. For those who live alone, the risk is even greater. Community-based supports and services can help people age in place for as long and as safely as possible. In this presentation, case studies show how complex chronic care management bridges medical and social care services for at-risk populations, and specifically for people living alone with dementia who have limited resources. Presenters share practical resources and strategies that help people living with dementia remain in their community.	<p>Sarah Dulaney, RN, CNS <i>UCSF Memory and Aging Center</i></p> <p>Lori Resnick, MPA <i>ONEgeneration</i></p>	Care management; People living alone with dementia
4/27/2021	<u>Community Health Workers: A key support for people living with dementia and their caregivers</u>	Studies have shown many benefits to using community health workers, including improving health outcomes and a reduction in hospitalizations. Community health workers can provide supportive services to people living with dementia and their caregivers all within their surrounding communities. This support can take many shapes such as the provision of home wellness and safety checks, assistance in navigating and accessing services, and the delivery of dementia-focused interventions. The ability of the community health worker to build trust and rapport with people living with dementia and their caregivers is key to their success. In this webinar, participants learn about two programs that use community health workers to help achieve their program goals.	<p>Constantina Mizis, MA <i>Latino Alzheimer's and Memory Disorders Alliance</i></p> <p>Alicia Nielson, LCSW <i>WellMed Charitable Foundation</i></p>	Community health workers; Innovative programs; Workforce
5/18/2021	<u>Person-centered Goal Discovery for People Living with Dementia</u>	Supports for people living with dementia and their families are most effective when they are person-centered and the result of a thoughtful planning process that considers what is important to them. When guiding providers on how to deliver high-quality support, it is important to use a clear and engaging approach to discover and address people's priorities as dementia progresses. This webinar presents foundational person-centered principles and provides examples of how to plan for people who are living with dementia in the community and other settings.	<p>Brian Van Buren <i>Western Carolina Chapter of the Alzheimer's Association</i></p> <p>Leigh Ann Kingsbury, MPA <i>The Lewin Group</i></p> <p>Shawn Terrell, MS, MSW <i>ACL</i></p>	Person-centered care

2021 Webinars (continued)				
6/23/2021	<u>Elder Abuse in People Living with Dementia: Prevention, Detection, and Intervention</u>	Elder mistreatment is a common phenomenon in our society, particularly among older adults with cognitive impairment and dementia. Yet there is hope. Using practical clinical and legal tools, we can look for high-risk situations and prevent abuse, and we can detect abuse at early stages to stop it from getting worse. In this webinar, conducted by a physician and an attorney with years of practical experience in the field, we discuss indicators that should raise concern, provide practical tips on when and how to intervene, and pay particular attention to the complicated issue of capacity.	<p>Laura Mosqueda, MD <i>Keck School of Medicine of USC</i></p> <p>Charles P. Sabatino, JD <i>American Bar Association, Commission on Law and Aging</i></p>	Elder abuse
8/24/2021	<u>Building and maintaining relationships after a dementia diagnosis</u>	Social isolation has a detrimental impact on the millions of persons living with dementia and their care partners in the United States. Conversely, we generally see greater satisfaction with support when emotional and social support are present for the caregiving dyad. In this webinar, the presenters discuss the importance of emotional and social support, why it may “dry up” after diagnosis, and why dyads may self-isolate, and propose some ideas for the families to foster support.	<p>Matthew Estrade, MSG <i>Ochsner Health</i></p> <p>Ana-Shea Edwards, Caregiver <i>The Dementia Diva</i></p>	Caregiver support; Social isolation
9/14/2021	<u>Community-based Dementia Programs: Learning from Challenges and Sustaining Successes</u>	Dozens of community-based dementia programs launched over the last few decades. In addition to supporting people living with dementia and family caregivers, most of these programs educate and provide training for professionals and members of the community. Addressing the wide range of training and support needs for these audiences has led to many lessons learned and provided the programs with a solid foundation for sustained success. This webinar provides an overview of the types of services and training provided by community-based dementia programs.	<p>Heather L. Menne, PhD <i>RTI International</i></p> <p>Phyllis Roate <i>Illinois Department on Aging</i></p> <p>Christy Nishita, PhD <i>Center on Aging, University of Hawaii</i></p>	Innovative programs; Sustaining programs
10/26/2021	<u>Promoting Brain Health through Education: Insights from Community-based Programs and Healthcare Systems</u>	Brain health refers to how well a person’s brain functions to support everyday activities within society. This webinar discusses the intersection between brain health and dementia and shares resources ACL has developed to help raise awareness around the importance of brain health. In addition, participants hear from two ACL dementia grantees, Summit County Public Health in Ohio and AltaMed Health Services Corporation in California, about why and how they provide education on brain health in their communities and health care systems. Grantees share information about the implementation and outcomes of their brain health efforts to date.	<p>Donna Barrett, MSW, LSW <i>Summit County Public Health</i></p> <p>Lourdes Birba, MSG <i>AltaMed Health Services Corp.</i></p> <p>Vijeth Iyengar, PhD <i>ACL</i></p>	Brain health

2021 Webinars (continued)				
11/16/2021	<u>Innovative Approaches to Supporting Professional Caregivers of People Living with Intellectual and Developmental Disabilities and Dementia</u>	Providing care and support to people living with IDD and dementia often requires unique skills, assessments and approaches. In this webinar, participants learn about two innovative ACL-funded programs that were developed to address the specific care and support needs of people living with IDD and dementia and the professional training needs of social service and health care providers who support them.	Art Walaszek, <i>Wisconsin Alzheimer's Institute</i> Kathy Service, <i>Massachusetts Department of Developmental Services</i> Christine Clifford, <i>University of Massachusetts Chan Medical School</i>	Innovative programs; Intellectual and developmental disabilities
2022 Webinars				
1/19/2022	<u>Dementia in the Community: Intergenerational Programming Aimed at Engaging Children, Youth, and People Living with Dementia</u>	Intergenerational- and youth-focused programs provide opportunities to enrich participants' lives and help address vital social and community issues while building on the positive resources that young and old have to offer one another and their communities. Research suggests that those living with dementia who participate in intergenerational programs show a decrease in social isolation and an increase in sense of belonging, self-esteem, and well-being. Programs that target youth can give them a deeper understanding of dementia and the older adult experience. These programs also provide support for the many young people who are engaged in care for an older adult. In this webinar, participants learn about two intergenerational programs for children and people living with dementia.	Al Castro, MS <i>United Community Center,</i> Melinda Kavanaugh, PhD, LCSW <i>Helen Bader School of Social Welfare, University of WI Milwaukee</i> Jenna Hauss, MSW Lori Resnick, MPA <i>OneGeneration</i>	Innovative programs; Intergenerational programs
2/24/2022	<u>Dementia Training for Law Enforcement Personnel: Building Partnerships to Enhance Community Safety</u>	As the prevalence of Alzheimer's disease and related dementia increases, law enforcement agencies across the country are increasingly called upon to respond to dementia-related incidents: wandering, abuse, domestic disturbances, and more. By collaborating with local dementia support organizations, law enforcement entities can better identify, understand, and support the needs of people living with dementia and those who care for them. This webinar reviews the development of a successful local law enforcement dementia training program, describing the key challenges and lessons learned for its ongoing implementation. Participants learn strategies for successful outreach and program development that they can use to develop partnerships with law enforcement in their communities.	Amy Abrams, MSW/MPH <i>Alzheimer's San Diego</i> Monica Cordero <i>San Diego County Sheriff's Department</i>	First responders; Safety

2022 Webinars (continued)				
3/31/2022	<u>Beyond “One Size Fits All”- Addressing the Needs of People Living with Dementia and Caregivers in Diverse Communities</u>	Service providers must take cultural differences into account instead of taking a one-size-fits-all approach to supporting persons living with dementia and their caregivers. This webinar highlights approaches to serving persons living with dementia in diverse communities. Information is provided on the unique circumstances of dementia in diverse communities, adjusting materials to meet the needs and preferences of diverse communities, and working specifically with people who are of Asian American and Persian American descent.	Sara Kachineh, MA <i>Alzheimer's Orange County</i> Amy Phillips, MPA <i>Little Tokyo Service Center</i>	Cultural awareness; Highest need communities;
4/21/2022	<u>Supporting Persons with Dementia Where They Live: Dementia Education for Building Management, A Chicago Model</u>	Building managers are the first line of contact for early identification of problems with older adult residents. Through a collaborative community-academic partnership between the City of Chicago Age-Friendly Commission/DFSS and University of Illinois Chicago, a Dementia Training Program for building management staff was created to address the problem of the changing health status of older adults living independently in high-rise buildings throughout Chicago. The data demonstrate that the participants consider the dementia training webinar to be beneficial: 94.5% of participants (n = 85) rated the program Excellent-Good, 98% of participants found it useful, and 92% were confident in their ability to refer residents to needed city services. Thus, educating building managers through a dementia training program creates a workforce that will recognize and address the changing health care needs of older adult residents, particularly those experiencing changes in cognition. This webinar includes information and findings from this program.	Victoria Russo, PhD, <i>Chicago DFSS, Senior Services Division</i> Victoria Gruss, PhD, <i>University of Illinois Chicago</i>	Innovative programs; Workforce
5/25/2022	<u>Wisconsin’s Dementia Care Specialist Program: A statewide effort to support people living with dementia, their family caregivers, and their communities</u>	During this webinar, presenters describe how the Wisconsin Dementia Care Specialist program serves individuals, families, and their communities as part of county-based aging and disability resource centers. The pillars of the program include assisting the agency to become dementia capable, acting as a catalyst for dementia- friendly communities, and supporting individuals living with dementia and their families to live at home in the community. The webinar also provides information on how the program started and evolved to become statewide.	Carrie Molke, MS Kristen Felten, MSW <i>Wisconsin DHS, Bureau of Aging and Disability Resources</i>	Dementia capability; Innovative programs

2022 Webinars (continued)				
7/19/2022	<u>Emergency response for people living with dementia and their caregivers</u>	The Middle Alabama AAA and Pelham Fire Department have worked closely the last several years on innovations to produce better outcomes for AAA clients. During this webinar, presenters from both organizations share how these partnerships started, give examples of the innovative programs on which they have collaborated, and provide information on how to better prepare for a disaster before it happens. The knowledge gained in this webinar can assist organizations as they develop emergency planning materials for clients living with dementia. Additionally, the webinar helps organizations identify and implement practices to both prepare for and respond to disasters.	Robyn James <i>Elder Justice Center of Alabama Middle Alabama Area Agency on Aging (M4A)</i> Adam Moore <i>Pelham Fire Department</i>	Disaster preparedness; First responders; Safety
8/30/2022	<u>Developing successful volunteer opportunities in dementia programs</u>	This webinar focuses on how selected dementia programs recruit, train, and retain volunteers by providing volunteers with meaningful work. The key to this concept in the Respite for All program is building a dementia-friendly group where everyone has purpose and no one is singled out for having memory issues. Volunteers are trained on creating opportunity for those with dementia to be of service to their community. The Durham Center for Senior Life (DCSL) engages volunteers in several activities and has leaned heavily on local students who have been trained to support the implementation of DCSL's evidence-informed intervention or who have supported dementia care management staff.	Melissa C. Black, MPH <i>Durham Center for Senior Life</i> Daphne Johnston, MA <i>Respite for All Foundation</i>	Volunteers
9/12/2022	<u>Building partnerships to scale effective dementia care supports: Indiana University and Indiana's Area Agencies on Aging</u>	Indiana University (IU) was awarded grant funding in 2020 under ACL's Alzheimer's Dementia Programs Initiative to implement the Caregiver Stress Prevention Bundle (CSPB) for people living with dementia and their informal caregivers. The CSPB is delivered through five AAAs by trained care coaches who are community health workers employed by the AAAs and supported by IU dementia care experts. Presenters share how the university partnered with AAAs to implement the dementia care program and results to date. Reasons AAAs partnered with IU to launch a dementia care program and plans for sustainability are discussed.	Steven R. Counsell, MD Kathryn I. Frank, RN, PhD <i>Indiana University</i> Tauhric Brown, CICOA <i>Aging & In-Home Solutions</i>	Caregiver support; Community health workers; Innovative programs

11/15/2022	<u>Seizing the Opportunity to Develop Dementia Programs: Successful program funding, planning, and delivery</u>	In this webinar, presenters describe the Administration on Aging/ACL ADPI grants. The webinar includes a discussion of the ADPI program and describes the ADPI grant planning process and related expert technical assistance provided throughout the grant period. The benefits of developing dementia programs that are tailored to the needs of your specific community are highlighted. The webinar also includes insights from existing and prior ADPI grantees about their experiences developing and implementing their dementia pilot projects.	Erin Long, MSW <i>ACL</i> Sari B. Shuman, MPH, MSW <i>RTI International</i>	Developing, implementing, evaluating programs; Federal programs
2023 Webinars				
1/18/2023	<u>Sharing the Care for Families Dealing with Alzheimer's Disease or Related Dementias: Alabama's PANDA Project</u>	The PANDA Project (Department of Family and Support Services) was piloted in Alabama in 2019, through funding provided by ACL. PANDA provides supportive services, including person-centered care plans, education, and training, for people living with dementia (PLWD), aging adults with IDD and their caregivers. Statistics show there are an estimated 15.7 million adult family caregivers caring for someone who has Alzheimer's disease or other dementias in the United States, and many caregivers cannot recognize when they are experiencing the early signs of burnout. This webinar describes the PANDA project and how Alabama AAAs are working together to provide consistency in the dementia services provided throughout their areas of the state.	Stephanie Holmes <i>Central Alabama AAA</i> Robyn James <i>Middle Alabama AAA</i>	Care management; Innovative programs; Intellectual and developmental disabilities
2/23/2023	<u>From Dementia to COVID-19: Maintaining Innovations using Data Driven Program Decision Making</u>	Innovative dementia programs can be translated and expanded to provide benefits to wider populations and as a vehicle for sustainability. During the COVID-19 pandemic, Hospital2Home (H2H), a highly successful dementia care transitions program, was translated to provide discharge relief to overtaxed hospitals and to prevent readmissions. A data-driven approach resulted in a successful collaboration with the county and expansion of H2H to other difficult to discharge, complex, and vulnerable populations. This webinar addresses how data can create a pathway for program expansion and sustainability.	Jeffrey B. Klein, FACHE <i>Nevada Senior Services</i> Peter Reed, PhD, MPH <i>University of Nevada Reno</i>	Developing, implementing, evaluating programs; Sustaining programs

3/22/2023	<u>Community-Based Early Dementia Screening Leads to Support for Caregivers and People Living with Dementia</u>	Community-based organizations play a key role in conducting dementia screenings in the community. These screenings can lead to referrals for a comprehensive medical assessment to assist in diagnosing dementia. In this webinar, participants learn about two ACL ADPI grantees conducting dementia screenings in the community.	Winnie Lam, LCSW, CDP <i>Chinese American Service League</i> Halleh Nia, MA <i>OMID Institute</i>	Screening tools
4/25/2023	<u>It's more than just money- Strategies for sustaining dementia programs</u>	This webinar highlights two ACL ADPI grants efforts to create sustainable dementia programs. The various aspects of community, organizational and financial sustainability are explored. Specific strategies and methods are discussed, including the use of outcomes data, organizational fit, potential models, and funding sources to sustain programs. The webinar also highlights areas needing further exploration, analysis, and pitfalls to avoid.	Salli Bollin, MSW, LSW <i>Memory Lane Care Services</i> Shelli Fortune, MSW <i>Missoula Area Agency on Aging</i>	Sustaining programs
5/25/2023	<u>Veterans Health Administration's Strategy to Promote Aging in Place for Veterans</u>	The Veterans Health Administration (VHA) understands the importance of providing options to Veterans as they age and their care becomes increasingly complex. Allowing Veterans to age in place is VHA's overarching goal for Veterans who both desire and are able to remain safely at home. The most common barriers for seniors to age in place are the increasing levels of assistance needed to maintain activities of daily living and instrumental activities of daily living, as well as transportation and affordable housing. The webinar provides an overview of VHA's Home and Community-Based Programs for all Veterans, including those living with dementia, and how to find additional information and resources.	Cheryl Schmitz, MS, RN, NEBC, CNS-BC <i>Office of Geriatrics and Extended Care, United States Veterans Health Administration</i>	Federal programs; Veterans

2023 Webinars (continued)				
6/20/2023	<u>It's a Journey: Age Friendly and Dementia Capable Health Systems</u>	Aging is a dynamic process that leads to new abilities and knowledge as well as risks for complex health conditions including dementia. The age-friendly and the dementia-friendly movements can work together to improve the health and well-being of older adults living with dementia and their families. These two national movements are key components of an age-friendly / dementia-friendly ecosystem and together they build better dementia-capable health services and supportive communities to support healthy aging for all older adults. This webinar addresses how aligning these initiatives with other system programming, and working with many community partners, there are sustainable and ongoing mechanisms to assess and support individuals in the community with dementia, as well as their caregivers.	Rani E. Snyder, MPA <i>The John A. Hartford Foundation</i> Heidi R. Wierman, MD, FACP <i>MaineHealth</i>	Dementia capability; Dementia friendly
8/29/2023	<u>Memory Connections: Helping Families Navigate Their Dementia Journey with a Menu of Program Options</u>	Memory Connections, an ACL-funded initiative through Senior Services Inc. in North Carolina, is a multifaceted project that offers support, creativity, education, and engaging activities for people living with dementia and their caregivers. The project includes a specific focus on reaching out to Hispanic Americans and African Americans because they are more likely to develop Alzheimer's disease or a related dementia than White Americans. In this webinar, participants learn how Senior Services Inc. and their partners, including the Maya Angelou Center for Health Equity, are working together to create a unique continuum of dementia care.	Anita Ford <i>Senior Services Inc.</i> Dr. Allison Caban-Holt <i>Wake Forest University</i>	Highest need communities; Innovative programs
9/20/2023	<u>Expanding Dementia Capability in Indian Country: A case example from Inter Tribal Council of Arizona, Inc.</u>	Limited availability of dementia services in Tribal communities has resulted in many community members voicing their concerns about the need for assistance and education. To help fill this void, the Inter Tribal Council of Arizona, Inc. (ITCA) is providing dementia-specific evidence-based training, community-based education, resources, and music strategies in Tribal communities. In this webinar, participants learn how the ITCA ADPI project is empowering Tribal staff and community members to become involved in providing dementia education and awareness in their communities. The Banner Alzheimer's Institute, a collaborative partner to ITCA, also shares information about the Walk with Me music program and how it can be used to increase the quality of life for someone living with dementia.	Mary Weston <i>ITCA Area Agency on Aging (AAA)</i> Heather Mulder <i>Banner Alzheimer's Institute</i>	Highest need communities; Tribal communities

2023 Webinars (continued)				
11/1/2023	<u>Applying the National Strategy to Support Family Caregivers to Dementia Programs</u>	The 2022 National Strategy to Support Family Caregivers was developed to support caregivers of all ages, regardless of where they live or their specific caregiving situation. The Strategy includes five overarching goals and 350 corresponding actions, while not addressing specific populations of caregivers. While the goals and actions contained within the Strategy are not dementia specific, they can be applied to dementia caregiving. This webinar focuses on the ways in which the goals can apply specifically to caregivers of people living with dementia and services designed to support such caregivers.	Greg Link, MA <i>ACL, Office of Supportive and Caregiver Services</i>	Caregiver support; Federal programs
2024 Webinars				
1/16/2024	<u>Strengthening the Dementia Capable Workforce: Dementia Training for Intellectual and Developmental Disabilities Service Providers</u>	As the population of individuals living with IDD ages, so does the incidence of dementia. Communities need to be prepared to serve and support this population. Education is one of the foundational components to ensure that person-centered care is provided, and systems can meet the unique needs of persons living with IDD and dementia. This webinar explores educational programs utilized when training providers of aging and IDD services, and how Ohio began to build systems to support individuals, families, and providers within local communities. Lessons learned, impact findings from educational sessions, accessible and replicable resources, and information on the overall system changes are shared.	Jenny Kinney, CTRS <i>Lucas County Board of Developmental Disabilities</i> Lyndi Wyrostek, LSW <i>Memory Lane Care Services</i>	Intellectual and developmental disabilities; Workforce
2/6/2024	<u>Finding the Way in Dementia Care: Use of Care Navigators for People Living with Dementia and their Caregivers</u>	Care Navigators are valuable members of interdisciplinary dementia care and support teams as they assist people living with dementia and their caregivers connect with needed resources and provide important insight and information about their clients to the full dementia team. In this webinar, participants learn about two programs using Care Navigators.	Michelle Johnston, MPH <i>California Department of Aging</i> Brooke Bryson <i>OCCK, Inc.</i>	Care management; Innovative programs
4/9/2024	<u>Sustainability: Keeping Dementia Programs Active Years After Initial Funding Ends</u>	Funding for dementia programming is often time limited, and early planning and flexibility is necessary to have the best possible outcomes for sustaining successful programs. In this webinar, participants hear about two programs that have been sustained years after initial program funding ended.	Renee Longarini <i>Southern Maine Agency on Aging</i> Martha York <i>WellWise Services AAA</i>	Sustaining programs

Date	Title	Description	Presenter(s)	Topic(s)
2024 Webinars (continued)				
4/23/2024	<u>Strategies to Address Social Isolation and Loneliness for People Living with Dementia and Their Caregivers</u>	Given the high prevalence and impact of social isolation and loneliness among PLWD and those who care for them, providing activities that offer a range of positive health outcomes is critical. In this webinar, presenters discuss the unique impact of dementia on social isolation and loneliness, tools for measuring these experiences, and common types of programs for addressing social isolation and loneliness among PLWD and their caregivers.	Melissa Hunter, MSW <i>RTI International</i> Terri O'Herron, CDP <i>Oakwood Creative Care</i>	Social isolation
5/22/2024	<u>Unique Approaches to Support Brain Health and Reduce Risk through Education, Exercise, Diet, and Art</u>	Helping people understand how to take care of their brains is an impactful way to reduce the risk of developing dementia long term. Dementia risk reduction activities show promise in improving brain health and reducing or delaying the onset of dementia. Modifiable risk factors—such as maintaining a healthy lifestyle and managing long-term health conditions—play a role in promoting brain health and reducing dementia risk. In this webinar, ACL provides an overview of the benefits of reducing risk and supporting brain health and reviews the Brain Health & Aging resources that can be used to educate the public about brain health as we age. Participants also learn about the We Program based at GrownUps in Puerto Rico, which was created specifically for people at risk of developing dementia.	Erin Long, MSW; <i>ACL</i> Heriberto Santiago, MPHG Jaelyz Torres, LCSW <i>We.grownups</i>	Brain health
6/25/2024	<u>Building Dementia Awareness in Tribal Communities through Interactive Programming: Implementing the Virtual Dementia Tour in Tribal Communities</u>	Discussion, education, and engagement have become key in supporting Tribal members living with dementia, their caregivers, and the community. The Virtual Dementia Tour has become a powerful way to build understanding and open the door to greater conversation and education about dementia within Tribal Communities. “The Virtual Dementia Tour,” created by P.K. Beville, is a scientifically proven method of building a greater understanding of dementia through the use of patented sensory tools and instruction. Presenters discuss their experiences using the Virtual Dementia tour and learn about its impact.	Amber Hoon, LPN, <i>Great Lakes Inter-Tribal Counsel</i> Carrie Lindsey, BSW, CSW <i>Oneida Comprehensive Care Division</i>	Highest need communities; Innovative programs; Tribal communities; Virtual programs

Date	Title	Description	Presenter(s)	Topic(s)
2024 Webinars (continued)				
8/12/2024	<u>Dementia Friendly Community Programming: Lessons From Las Vegas</u>	Dementia Friendly Clark County is a grassroots initiative dedicated to supporting individuals and families affected by dementia in the Las Vegas Valley. The initiative focuses on strengthening local communities to become more respectful, educated, supportive, and inclusive of PLWD and care partners. However, their impact isn't confined to just the local community. By offering Dementia Awareness Training to Las Vegas hotels and the international airport, they are extending their reach globally. This presentation illustrates how implementing dementia awareness training in one of the world's most renowned tourist destinations transcends community outreach, fostering a worldwide impact.	LeeAnne Mandarino, MA, CDP <i>Cleveland Clinic Lou Ruvo Center for Brain Health</i> Danielle Mose <i>Clark County Department of Aviation, Harry Reid International Airport</i>	Dementia friendly
8/27/2024	<u>Cognitive Stimulation Therapy Programs - Directly Supporting People Living with Dementia</u>	Cognitive Stimulation Therapy (CST) programs are providing direct support to PLWD including those with mild cognitive impairment, Alzheimer's disease and related dementias (ADRD), primary progressive aphasia, and IDD. ACL's ADPI grantees are expanding their services to meet a variety of needs through these evidence-based/informed small group programs. Through virtual and in-person sessions held over 7 weeks, participants strengthen their retained cognitive abilities and decrease depressive symptoms while gaining confidence and social connection and improving their well-being. In this webinar, two organizations highlight their CST programs while sharing successes, challenges, and lessons learned.	Kelsey Akinsinde, MS, CCC-SLP <i>CareLink</i> Stephani Shivers, MEd, OTR/L <i>CaringKind</i>	Innovative programs; Virtual programs
9/16/2024	<u>Younger Onset Alzheimer's Disease and the Importance of Community Support</u>	Living with younger onset Alzheimer's disease brings difficult adjustment and challenges, including changes in communication, relationships, and everyday tasks. Along with these adjustments, those living with younger onset Alzheimer's disease also talk of the loneliness of this disease. Creating support groups is one way to help reduce the feelings of isolation. This session draws from the experiences of the Without Warning support program from the Rush Alzheimer's Disease Center.	Susan Frick, MSW, LSW <i>Rush Alzheimer's Disease Center</i>	Social isolation; Younger onset dementia

2024 Webinars (continued)				
10/16/2024	Choosing, Implementing, and Evaluating Dementia Programs: Know the Key Factors	<p>Many types of programs have been developed in support of people living with dementia and their caregivers. When deciding to offer a dementia program, commonly referred to as an intervention, organizations must first determine which one may work best for their community and clients. Organizations must then assess how they will implement and evaluate the chosen dementia program. It is essential to pay careful attention to multiple factors such as the cost, training and staffing requirements, method of program delivery, and evaluation options. In this webinar, we discuss the process of choosing, implementing, and evaluating dementia programs. We also review the updated NADRC resource, Grantee-Implemented Evidence-Based and Evidence-Informed Dementia Interventions and highlight key aspects of the guide.</p>	<p>Ashlee Cordell, MGS <i>RTI International</i></p> <p>Erin Long, MSW <i>ACL</i></p>	<p>Developing, implementing, evaluating programs</p>
12/9/2024	Specialized Aging Support: Providing Care for Those with Intellectual and Developmental Disabilities	<p>People with IDD face lifelong battles of access to and inclusion in services. Throughout the aging process, even more significant needs for support present as they experience AD/DRD at a staggering rate. As individuals with Down syndrome and other IDD diagnoses face everyday challenges associated with the onset of AD/DRD, they also face struggles of providers and caregivers who are unsure of future supports. Participants in this webinar learn about the Specialized Aging Support Program at ARC of Jacksonville that launched services in support of their community, to include development of an interactive day center for those living with and at high risk of dementia, caregiver support and education, and trainings focused on IDD and dementia.</p>	<p>Abbey Such, OTR/L <i>The Arc Jacksonville</i></p> <p>Eunice Howard, <i>The Arc Jacksonville</i></p>	<p>Intellectual and developmental disabilities</p>

2025 Webinars				
5/21/2025	<u>Creating a Dementia-Capable Workforce of First Responders</u>	It is not uncommon for PLWD and their caregivers to encounter first responders, including law enforcement, as they age in their homes and communities. These encounters are often associated with dementia-related symptoms. To best serve PLWD, first responders benefit from thorough training to understand dementia and its symptoms. Through their ADPI grant, the North Central Texas Council of Governments (NCTCOG) engaged Dementia Friendly Fort Worth (DFFW) to design and implement a full-day dementia training program from which over 800 police cadets have benefited. This webinar explores the partnership between NCTCOG and DFFW and how they developed and implemented their curriculum, including the engagement with the police academy leadership and its impact on cadets' knowledge, skills, and attitudes.	<p>Doni Green <i>North Central Texas Council of Governments</i></p> <p>Christy Martinez <i>North Central Texas Council of Governments Regional Police Academy</i></p> <p>Gail Snider <i>Dementia Friendly Fort Worth</i></p>	Dementia capability; First responders
6/4/2025	<u>Life Experience Informing Careers in Dementia Services and Supports: Panel Discussion</u>	The overlap of professional and personal lives can be a challenge to navigate, but there are opportunities for each role to inform the other. It is not uncommon for professionals in the dementia field to have personal experiences as caregivers. This personal experience informs their work, providing opportunities to infuse their perspective in the programs and services they develop and deliver. The lessons learned from people who experience both roles are compelling and can help guide dementia work and caregiving practices. This webinar has a panel discussion about the intersection of careers in supporting people living with dementia and caregivers and the ways their personal experiences as dementia caregivers have informed this work.	<p>Salli Bollin, MSW, LSW <i>Memory Lane Care Services & Ohio Council for Cognitive Health</i></p> <p>Atheda Fletcher, CDCS <i>Absentee Shawnee Tribal Health System</i></p> <p>Stephanie Hughes, MPP <i>RTI International</i></p> <p>Stephani Shivers, Med, OTR/L <i>CaringKind</i></p>	Caregiver support; Lived experience
6/18/2025	<u>Expanding the Reach of Dementia Programs: Making a Plan and Pivoting as You Learn Through Implementation</u>	Even with the most thoughtful program planning, sometimes plans don't work as expected when you get to real-world implementation. Reaching and engaging people for dementia programs may require a willingness to adjust course and engage unanticipated partners and participants as you learn through practice. This presentation showcases the work of two dementia programs that made significant adaptations to their original outreach, recruitment, and partnership plans to support the uptake of their community dementia programs.	<p>Todd Hunnicutt <i>Aging & In-Home Services of Northeast Indiana</i></p> <p>Susan Sprague <i>OOCK Inc.</i></p>	Outreach and recruitment

2025 Webinars (continued)				
7/9/2025	Lewy Body Dementia: Navigating Diagnosis, Care Strategies, and Essential Support	<p>Lewy body dementias (LBD) are the second most common form of degenerative dementia and affect approximately 1.4 million people in the United States. This webinar covers key aspects of LBD, including symptoms, diagnosis, and care considerations, while highlighting the real-life experiences of a former care partner who navigated the complexities of LBD within her own family. Participants gain valuable perspectives on the challenges faced by individuals living with LBD and their caregivers and explore practical strategies for providing compassionate, informed support.</p>	<p>Helen Bundy Medsger Julia Wood, MOT, OTR/L <i>Lewy Body Dementia Association</i></p>	<p>Caregiver support; Lewy body dementia</p>
