

ECU School of Dental Medicine Community Service Learning Centers Multiple locations throughout North Carolina

Program Overview

The East Carolina University School of Dental Medicine Community Service Learning Centers operate in many locations across North Carolina. The purpose of these centers is two-fold: individuals who need dental care receive increased access to services and dental students receive clinical training. Services include cleanings, sealants, x-rays, extractions, fillings, crowns, bridges, dentures, and root canals. The community service learning centers target individuals living in rural and underserved areas of North Carolina.
